LINE 1 	Part	5X-2652248
	Current Mode	Line Stop
	OT Cause:	Production
	Mode Duration:	2:01:55
	Part Strokes:	1263
	Efficiency:	19.6
	GSPH:	394.2
	RunTime:	0:56:00
	OT Duration:	2:10:04

LINE 3 	Part	5X-2652248
	Current Mode	Actual Operation
	OT Cause:	N/A
	Mode Duration:	1:45:24
	Part Strokes:	371
	Efficiency:	4.3
	GSPH:	62.6
	RunTime:	2:00:00
	OT Duration:	2:29:21

LINE 2 	Part	5X-7524265
	Current Mode	Line Stop
	OT Cause:	Production
	Mode Duration:	1:59:32
	Part Strokes:	0
	Efficiency:	0.0
	GSPH:	0.0
	RunTime:	0:00:00
	OT Duration:	1:59:32

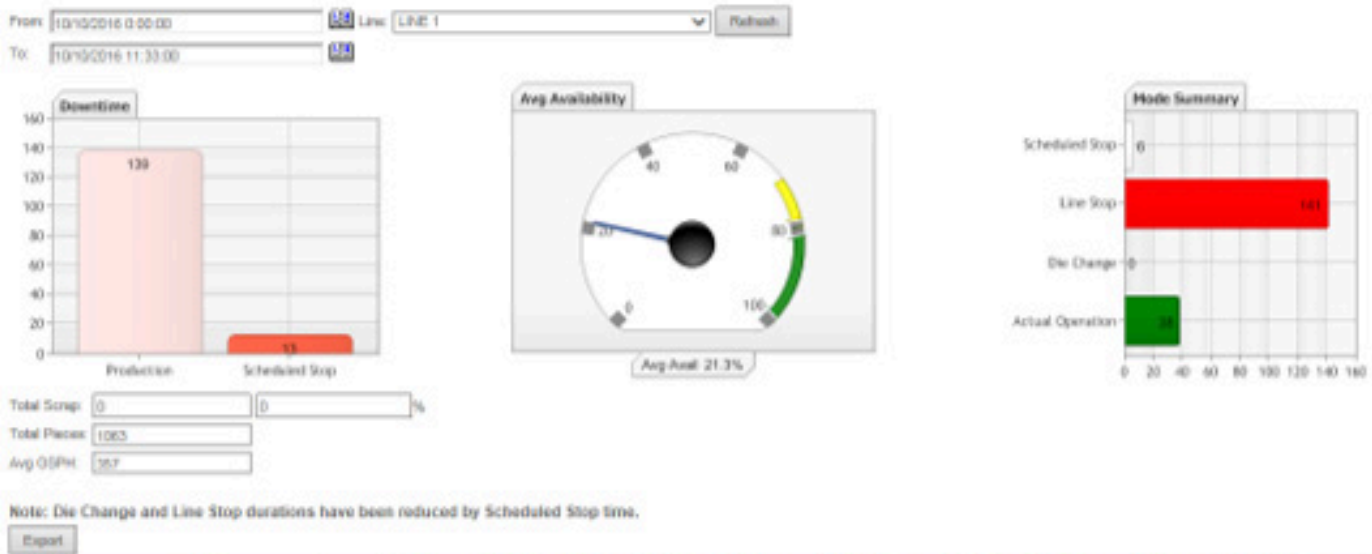

What is AIM Enterprise?

- Web-based production reporting and visualization tool
- Designed for stamping industry operations
- Provides real-time production data anytime, anywhere
- Improves visibility across lines, shifts, and parts
- Supports better decision-making with live insights

How It Works

Line Analysis Module - Production View

Tracks:

- Faults and downtime duration
- Mode changes (operation, die change, line stop)
- Recipe changes
- Shift data

Data Collection & Monitoring

- Logs production data at each line
- Transfers data to a central server via SQL
- Monitors line status in real time
- Requires downtime reason before restart

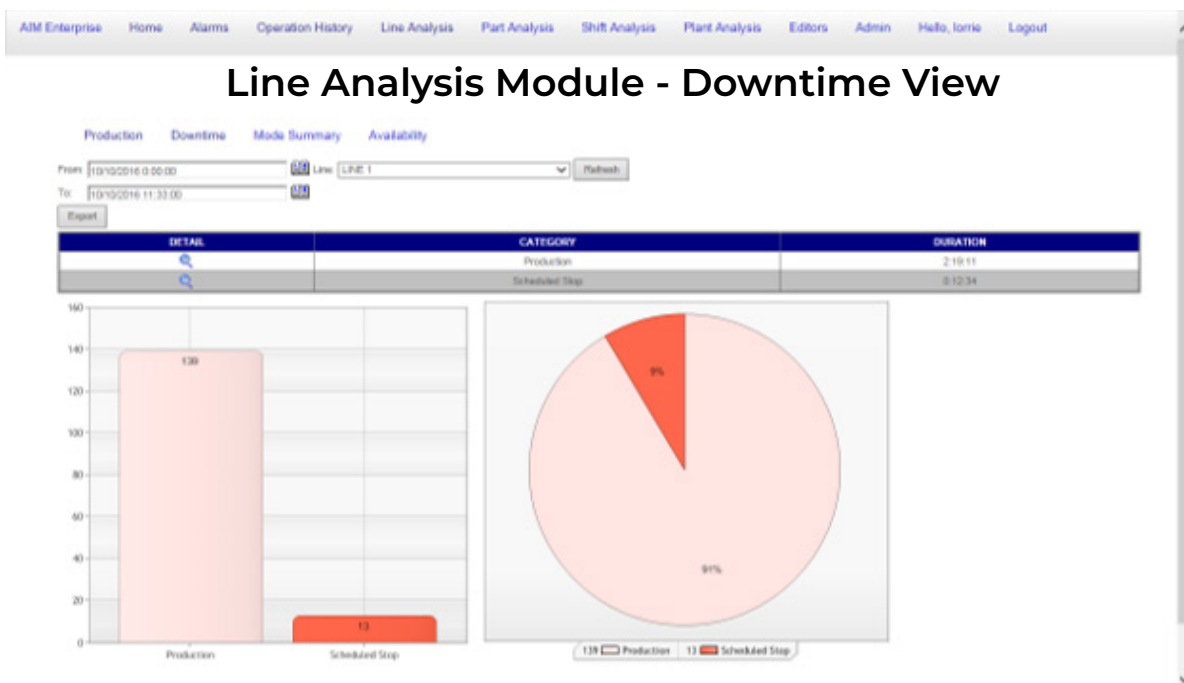

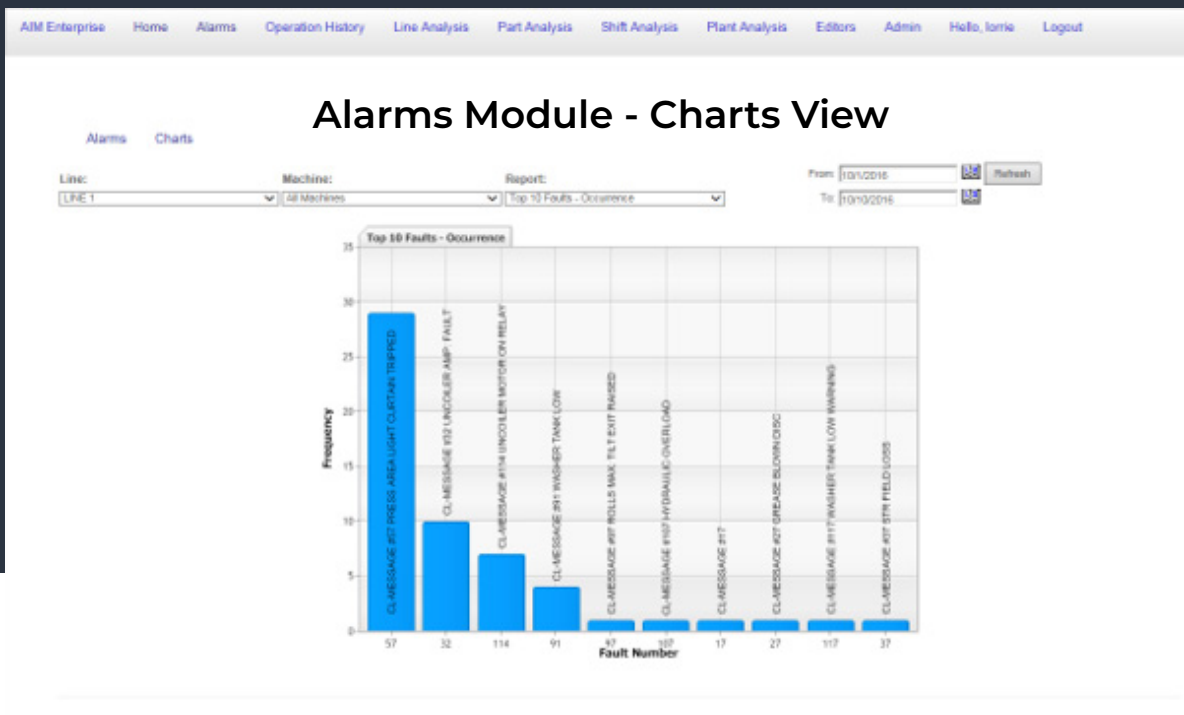

Data Captured

- Operator inputs and button activity
- Faults and duration
- Mode changes (run, die change, stop)
- Recipe and shift changes

Key Features

- Real-time production monitoring by line, part, and shift
- Alarm tracking with detailed fault information
- Line analysis for production and downtime tracking
- Shift and plant performance comparison tools
- Part-level production reporting and filtering

Advanced Capabilities

- Export production data to Excel
- Printable reports for easy sharing
- Custom reporting by line, shift, or part
- View production data across multiple plant locations in a single, centralized dashboard

Why Upgrade to AIM Enterprise?

- Reduce downtime with real-time visibility
- Improve accuracy and eliminate manual tracking
- Increase production efficiency
- Easily access and share your production data with built-in exports
- Manage users, settings, and production details in one place

Upgrade Your System. Protect Your Operations.

Move to AIM Enterprise to ensure system reliability, data security, and future-ready performance.
